

DASHBOARDS

“The dashboard that MWA FORZA provides is truly innovative for this industry. Being able to view large amounts of data in real-time, all at the user’s fingertips, gives us a competitive advantage in the channel.”

- David Scibetta, CIO of Copier Fax Business Technologies

MWA FORZA, built on SAP Business One®, delivers thorough and timely business knowledge necessary for critical decision making in the imaging channel.

Rapidly produce meticulous reports across the entire business process

Diminish time and effort allocated for reports and IT dependence with cost reductions

Effortlessly export reports to copious formats tailored to your needs

Dashboards display straightforward pie and bar graphs of transactional data

Personalized dashboards enable real-time information supporting critical business decisions

Frequent functions are presented in a user-friendly format once logged in

The most important benefit to any system is providing the information that you require to run your business easily and accurately. FORZA delivers in spades! FORZA is built upon the most advanced and widely used ERP in the world, and has the same analytical engine only seen in large enterprise solutions. For the first time, our industry now has access to the most visual, real-time information ever delivered by a solution. At the heart of the analytic engine is the dashboard view, providing real-time, relevant information to you!

Dashboards can be created by SAP Business One partners and customers to fit their specific needs. We realize that in our vertical market, just because dealers are in the same industry doesn’t mean that they operate the same way. Any analytical data can be turned into a dashboard to be used internally or externally. The sky is truly the limit - can your current system do that?

DASHBOARDS

A visualization of all sales opportunities are exhibited as segments in a graphic. The different colors represent the distribution of descriptions pertaining to particular opportunities being analyzed.

Real-time sales analysis gives the entire business full transparency. As an opportunity gets created and progresses from the lead to quote phase, updates occur in the dashboard instantaneously.

Manage your service department with at-a-glance capabilities to quantify the efficiency and performance of your technicians. The ability to view your own service calls or all open service calls provides an in-depth account of analytical support.
