

INVOICES

“We will be able to track the revenue stream better with the MWA FORZA SAP product... Everything is now coming under one umbrella...”

- Chip Miceli, CEO of DPOE

MWA FORZA, built on SAP Business One®, provides the imaging channel with a fully streamlined process when handling invoices.

 Linked sales and purchase documents eliminate repetitive manual entry

 Approval validation stages for created documents

 Setup recurring transactions for quicker A/R or A/P invoice billing

 Combine multiple documents via consolidated billing

 Real-time general ledger tracking and financial reporting

 Integrated audit trail and relationship maps display document history

The invoicing process involves multiple document stages streamlining the flow for sales and purchasing procedures. From the sales quotation to the A/R invoice and from the purchase order to A/P invoice, the ease of each transaction is simplified to be more user-friendly. A more integrated solution results in efficient and effective data entry, eliminating repetitive actions.

With MWA FORZA, dealers have the option to modify the format of invoice templates. This feature is the result of FORZA's open-architecture platform. This flexible invoice set-up allows dealers to provide any information on their invoice to conduct their business any way they see fit.
