

MANAGED SERVICES

“Having the capability of managed services within my current ERP allows our dealership to grow outside of our channel without having to invest in other costly systems!”

- Chip Miceli, President DPOE

MWA FORZA, built on SAP Business One®, delivers management services to the imaging channel along with a platform agnostic MPS tool.

Managed IT infrastructure

Reduced IT overhead

Automatically maintained and updated

Increase ROI for high-volume machines

Reduce costs associated with print and expenses with inaccurate data

Manage after-market inventory and replenishment

Contact us today for a demo!

MWA FORZA delivers managed print services (MPS) and managed network services (MNS) to the imaging channel by providing a full end-to-end solution without the need for bolt-ons or additional software. With FORZA, dealers now have the freedom to assess machines in the field, capture meter data, and alerts and provide true project management capabilities to their end users. Dealers become a true one stop shop with growth potential both inside and outside of the imaging channel.

The project management feature lets you manage your projects more effectively from start to finish. You can centralize all project related transactions, documents, resources, and activities. The feature helps you monitor the progress of tasks, stages, phases, and the overall project, analyze budget and costs, and generate reports on various aspects of the project, such as stage analysis, open issues, and resources.

MANAGED SERVICES

FORZA, built on SAP Business One, expands project management capabilities into a full module, which helps monitor the progress of tasks and stages, including all project-related transactions, documents and resources.

ProjName	ContractID	BP Code	BP Name	Description	Start	End	Calls	Act.	PO	Est. Hrs
Jockers	16	C30000	Microchips	New Server & Printer Install	02/28/2008	02/28/2010	5	16	0	158.00

Printers	22	C60000	SG Electronics	SG Head Office Network Install	05/01/2009	05/31/2010	5	6	0	45.00
Network Installation	23	C30000	Microchips	Network	04/08/2010	04/08/2010	4	0	0	55.00
Network Installation	24	C30000	Microchips	Network Install	04/07/2010	04/07/2010	4	0	0	55.00
Network Installation	25	C30000	Microchips	Network Install	04/07/2010	04/07/2010	4	0	0	55.00

The project management component combines all financial and project management data into one solution. Doing so allows users to measure actual costs incurred by a particular task, and compare it to its budgeted costs. This can help management understand costs related to specific tasks and better assist them in planning and budgeting for future projects.

Project - SAP Business One 9.2 Implementation

Project Type: External Internal

BP Code: C30000

BP Name: Earthshaker Corporation

Contact Person: Bob McNamee

Territory: [Blank]

0.00	0.00	0.00
0.00	0.00	0.00

List of Employees

#	Last Name	First Name	Employee
1	Duffy	Richard	1

FORZA centralizes all project related documents, resources and transactions in one place. This helps users monitor the progress of various tasks and stages, and allows you to track projects according to business operations.

Management will experience better project transparency by creating activities from the module. This provides an overview of every activity the project team has created against a particular stage.

This, along with the other features, allows you to manage projects more effectively, and efficiently, from start to finish.
